What our customers are saying about us

Developing Outstanding Asset Management Professionals

What our customers are saying about us...

BAE SYSTEMS

"The Asset Management Academy has proved to be truly flexible in tailoring their training package to meet our Asset Management training requirements. The training provided has not only delivered outstanding IAM Certificate results, it has proved invaluable in ensuring people from the different areas and levels of our organisation have a good understanding of the value that effective asset management can deliver to our business."

nationalgrid

"I attended a 6 day Asset Management certificate course with a final examination on day 6 arranged through the Asset Management Academy in April 2015. The AMA course content was comprehensive and professionally presented by a highly experienced industry expert in Asset Management. Each and every day was a full learning experience and the excitement in the lecture room among the 15 company delegates was palpable.

Back in the work place (a month later) the delegates are fully engaged about what they learned and seeking opportunities to apply their extended Asset Management knowledge. The certificate course content in my opinion is vital for industry professionals who work with and manage an aging infrastructure asset base. We achieved a 100% pass rate."

بلدية مدينة أبوظبي
ABU DHABI CITY MUNICIPALITY

"I have no hesitation recommending the suitability of the course material, presenter and interaction with participants as it provided an up-to-date opportunity to be appraised of the latest standards and integrated practices in Asset Management. I am looking forward to continuing the professional development and accreditation in this path in due course, as I see high relevance and practical benefits of all the insights and frameworks presented."

"I attended the IAM Certificate course in Calgary, Canada, which was intense and informative. Although there was a lot of ground to cover the trainer was very knowledgeable and helpful to all participants. AMA has a great support system in place and I would recommend them to anyone who has a desire to learn more on asset management or who may be just starting out. Thank you AMA I look forward to future courses!"

"The AMA certificate course was enlightening, enjoyable and very relevant to my work. I was extremely impressed with the course delivery, and I found the personnel and material both excellent, and very helpful. As was all dealings with the AMA. I would recommend it to anyone who wants to start a career in Asset Management."

Balfour Beatty

"The crash course for the IAM Certificate was informative, well delivered and perfect for my needs. I have learnt a large amount in the two days with many elements that can be taken back and applied to our business processes and policies to improve our asset management capability."

"Although I was pretty confident of my asset management knowledge beforehand, I took the AMA's Certificate Focused course to make sure I had all the bases covered before sitting the IAM exam. It proved a wise decision. The course was well delivered, I felt comfortable with the exam and most importantly I passed!"

IAM Qualifications

Good Asset Management is critical to the success of businesses which depend on the availability and reliability of physical assets.

Widespread adoption of BSI PAS 55: 2008 and the new international standard for Asset Management systems (ISO55000) confirms the value of a systematic approach. The Institute of Asset Management (IAM) professional qualifications are essential tools for building and demonstrating the competence of Asset Management teams:

- The IAM Certificate is designed for new entrants to Asset Management roles or people with limited experience
- The IAM Diploma is designed for people being prepared for management responsibilities or specialist roles in Asset Management

Global Reach

The Academy enjoys an international reputation and offers its clients global access to its services.

It is based in the UK with operations in Europe, North America, the Middle East and South East Asia and trusted partners in China, Australia and New Zealand and South America.

Our services

The AMA offers a programme of public courses delivered at locations around the world as well as in-company courses for organisations that have specific training requirements.

1. Asset Management eLearning accessible anywhere in the world, we offer eLearning for the IAM Certificate, CAMA and the IAM Foundation Award
2. Face to face classroom training delivered in public courses globally and directly at client organisations
3. Remote training delivered globally online, we can deliver the IAM Certificate and Diploma directly to groups spread across the world.
